Communication Devices Business Group

Product Change Notification

Thank You for your business and continued interest in TDK's RF Components.

Name of change	Lifecycle status change from production to NRND for the following RF Components.		
----------------	--	--	--

TDK Part #	DEA202450BT-1294C1-H	Direct Replacement	DEA202450BT-1294D1-H
------------	----------------------	--------------------	----------------------

Purpose

This is an official notice of the production status change for the product mentioned above. This product has been revised to Not Recommended for New Design or "NRND". NRND is a production status classification that indicates a part number is approaching the end of its product life cycle. It is not End of Life, rather NRND represents the period between mass production and End of Life (EOL). NRND addresses the natural decline in market sales and may identify a consolidation/changing of the product portfolio dependent on market conditions.

TDK will Offer a suggested replacement alternative whenever possible, and DEA202450BT-1294D1-H is a direct replacement of DEA202450BT-1294C1-H. The components themselves are exactly the same; the only difference between the two is the type of carrier tape. The C1-H type has a hole and the D1-H type has no hole. Should you have any questions please contact your TDK Sales Representative for additional support.

Schedule : Effective June 18, 2020		Attachment : Yes <input checked="" type="radio"/> No <input type="radio"/>
