Select Bourns® Model SRU1048 Series Shielded SMD Power Inductors

Change to Inductor Shield Design

Riverside, California – July 21, 2021 – Effective January 15, 2022, Bourns will change the inductor ferrite shield design for select [Model SRU1048 Series Shielded SMD Power Inductors](#). The wire groove of the modified ferrite shield will be narrowed which will result in a better fitting for the wire lead.

Affected Part Numbers					
SRU1048-101Y	SRU1048-221Y	SRU1048-331Y	SRU1048-471Y	SRU1048-561Y	SRU1048-820Y
SRU1048-151Y	SRU1048-330Y	SRU1048-470Y	SRU1048-560Y	SRU1048-680Y	

The form of the inductor will change because of the narrower wire groove. The fit and function of the inductor will remain the same. The quality and reliability of the component should be improved.

Inductor samples with the new ferrite design are available upon request.

Users should verify that the described changes will not impact the performance of the product in their specific applications.

IC2174

Implementation dates are as follows:

Date that products with existing ferrite shield design will cease: **January 15, 2022**

Date that deliveries of products with new ferrite shield design will begin: **January 16, 2022**

First date code using the above changes: **2203**
